

三、双金属温度计 Bimetal Thermometer

南京迪泰尔仪表机电设备有限公司 <http://www.detair.cn/>

双金属温度计是采用双金属片作为感温元件用于测量中低温的一种测温仪表。与玻璃温度计比较，具有无汞害、读数清晰、坚固耐用的特点。广泛用于机械、化工、轻纺、制药、食品、船舶等生产过程中的测量和控制。

Bimetal Thermometer is a measuring gauge which used bimetal piece as sensor part to measure low or medium temperature. Compare to the glass thermometer, it has advantages as non-Hg, clear in reading, durable. Widely used in machinery, chemical industry, textile, medicine, foodstuffs, vessel and so on for measuring and controlling the temperature.

1. WSS系列双金属温度计

WSSX系列电接点双金属温度计

WSS系列双金属温度计是一种普通现场指示型测温仪表。WSSX系列电接点双金属温度计能在工作温度达到或超过(低于)给定值时发出信号。

1. WSS Bimetal Thermometer

WSSX Bimetal Thermometer

WSS bimetal thermometer is a general measuring gauge indicating the temperature on-the-spot. WSSX bimetal thermometer can send out the message when the temperature reach or exceed (lower) the setting temperature.
